

The Window Scarf is an extremely versatile drapery item. You become the designer by draping the scarf to suit your personal tastes. Or you can create the look shown in our catalog by following these simple instructions. A single decorative rod is needed for this treatment, but decorative rings also can be used.

- 1** Accordion-fold the scarf lengthwise into a 3" to 4" wide strip.
- 2** Drape one end to the floor, then, starting from the back, swoop the other end over the rod.
- 3** Continue by looping the scarf around the rod again, working back to front.
- 4** Let the remainder of the scarf fall in front of the rod.

You can hang this scarf symmetrically or asymmetrically. Experiment with more or fewer loops — or try knotting the scarf around the rod. With your creative ability and the scarf's versatility the options are endless.

- * To avoid the scarf from sliding off the pole, place velcro strips directly on the fabric and on the pole by peeling off the paper on the back of the velcro.
